Compensation Methods of TRILLANT'S TTT Pillars

AUG 23 2022

www.trillant.com

TRILLANT
THE NEW ERA OF FINANCIAL FREEDOM

TTT defined

TTT represents the combined structure of three pillars:

VALUE TOKEN

TRILLANT

STABLECOIN

TRILLON

INTERNATIONAL
MARKET PLACE

TRILLANDO

TTT offers compensation through four methods, which may coincide:

METHOD 1

Buy/sell Trillant token based on speculation

METHOD 2

Buy and „stake“ Trillant token for fixed profits according to the selected term

METHOD 3

Referral percentage on recommended partners for the first three levels

METHOD 4

Shared compensation on TRILLANDO marketplace fees

Method 1

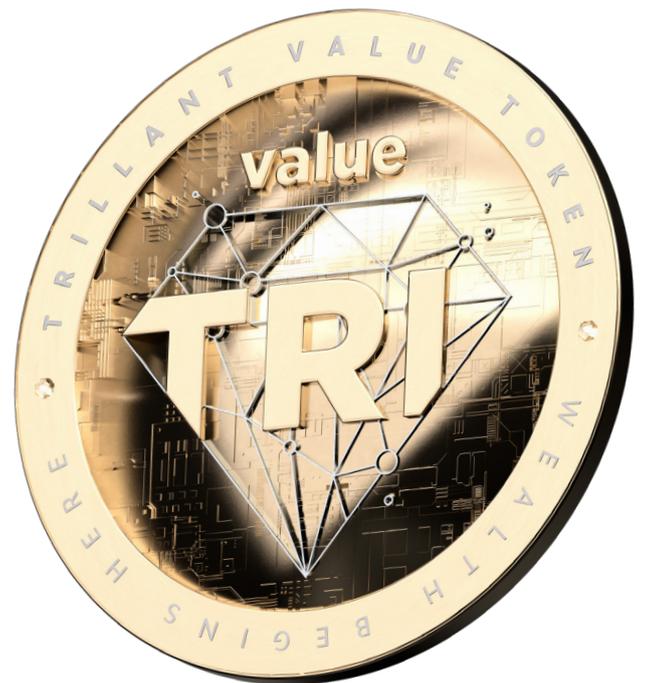

Buying/selling on speculation

TRILLANT is a value token.

TRILLANT is a value token. The tokens are bought and sold through exchanges, supply and demand regulate the price, and no „haptic material value“ is associated. TRILLANT's value is generated by the community's ownership and use of the token.

The larger the community, the greater the basis is for establishing intrinsic value. Accordingly, with the increase in acceptance and use of the TRILLANT token, the greater its stability and balance between supply and demand. The TRILLANT token value is directly related to the community's growth and the demand for token use.

Speculation buyers purchase TRILLANT tokens based on their projection that the community and demand will grow, along with its exchange rate on the stock exchanges.

Method 2

Buy and „stake“ Trillant token for fixed profits according to the selected term

The word „stake“ means to „store“ or „secure.“

Staking indicates that „constant“ availability is waived for a set period to receive agreed earnings on the staked amount.

Registered and verified participants of the Unique Exchange may link to the Trillant dashboard for staking in TRILLANT with four different term options available that produce earning shares accordingly.

There are three sub-annual staking periods (referred to as „Short-term“) and a one-year staking period (referred to as „Long-term“). Earnings are related to the value at the time of staking.

Staking periods		Yield shares
Short-term	4 weeks	1,5 %
Short-term	9 weeks	3,5 %
Short-term	26 weeks	11,0 %
Long-term	52 weeks	50,0 %

The earning shares (profits) are fixed for the selected staking time based on the current value of the TRILLANT token at the specific time of staking but independent of

price changes during the term. The profits are distributed weekly as **TRILLON tokens** and credited to the ‚Balance‘ (the credit account) within the TRILLANT dashboard.

EXAMPLE 1:

You buy \$10,000 of TRILLANT tokens and stake for nine weeks at **3.5%**. You receive 350 TRILLON tokens total. The 350 TRILLON tokens are then divided into nine weeks and distributed at **38.89 TRILLON tokens per week** (commercially rounded), which is added to the balance in the TRILLANT dashboard.

EXAMPLE 2:

You buy \$10,000 of TRILLANT tokens and stake for 26 weeks at **11%**. You receive 1,100 TRILLON tokens total. The 1,100 TRILLON tokens are then divided into 26 weeks and distributed at **42.31 TRILLON tokens per week** (commercially rounded), which is added to the balance in the TRILLANT dashboard.

EXAMPLE 3:

You buy \$10,000 of TRILLANT tokens and stake for 52 weeks at **50%**. You receive 5,000 TRILLON tokens total. The 5,000 TRILLON tokens are then divided into 52 weeks and distributed at **96.15 TRILLON tokens per week** (commercially rounded), which is added to the balance in the TRILLANT dashboard.

The distributed TRILLON tokens may be sent to the Unique Exchange from the Trillant Dashboard.

After the staking time has expired, the staked TRILLANT becomes „free“ again. The value at term expiration is equivalent to the current price traded on the stock exchanges. „Free“ also means that it can be transferred or exchanged (sold).

Of course, the TRILLANT can also be placed into a new staking term and is regarded as a „separate contract.“ The staking times are freely selectable, and several identical or different „stakings“ may exist side-by-side.

52-WEEK SPECIAL FEATURE

Exclusively in the long-term, 52-week staking, a special feature should be emphasized. In the back office of the TRILLANT dashboard, there is an **OPTIONS button** for each long-term contract. The function of the Options button is as follows:

Suppose the value of the TRILLANT is 10 cents when you start staking. In example 3 above, you would receive just over 96 TRILLON a week for 52- weeks. However, a problem would arise if the price increased.

WITHOUT an option, the contract ends „as agreed.“

The TRILLANT tokens are then „free,“ as already described.

With the use of the options button, the „agreed“ 52-week commitment starts all over again at the time of activation. In return, you will receive the „updated“ evaluation of the TRILLANT and, at the same time, exactly 168 hours (1 week) later, also the „updated“ earning shares from it.

This use of the options button is possible again at the earliest four weeks after the activation or after the last use. The number of uses is not limited, so technically, it can be repeated over and over again.

Again, using **example 3**, at a rate of 15 cents and the use of the Options Button (which has to be activated by the user itself), **you would receive around 144 TRILLON instead of the previous 96 TRILLON.**

DEFINITION OF THE STABLE COIN

TRILLON

TRILLON is a stablecoin, indicating that the token issuer must maintain a matching deposit equivalent in US dollars. TRILLON owners can rest assured that:

- TRILLON at „ANY TIME“ is worth \$1.00
- TRILLON at „ANYTIME“ is available for use by exchanging it for fiat currency (e.g. in euros, dollars, pounds sterling, etc...)
- TRILLON at „ANYTIME“ is available to exchange to TRILLANT or other cryptocurrencies
- TRILLON at „ANYTIME“ is available to send to individuals or companies
- TRILLON at „ANYTIME“ is available to pay for services, products, and goods
- TRILLON holds valuable storage (similar to the exchange rate of the US dollar)

Method 3

TRILLANT
3
COMMISSIONS

Referral Percentage for recommended partners

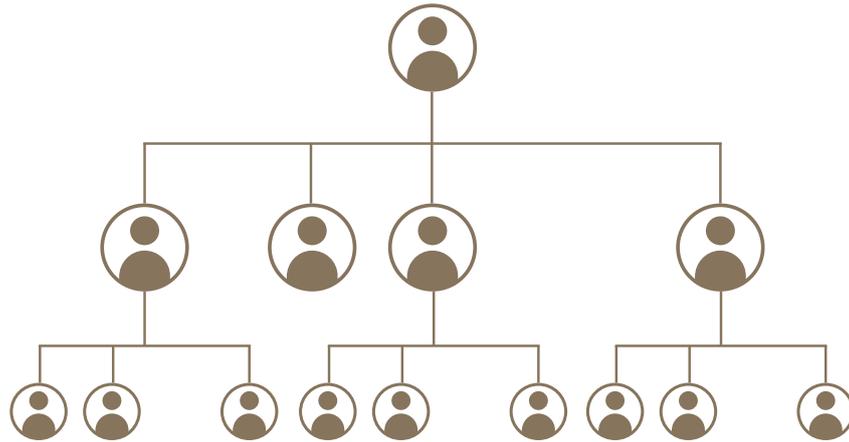

TRILLANT AFFILIATE PROGRAM

LEVEL 1
10 %

LEVEL 2
5 %

LEVEL 3
5 %

After a successful recommendation, i.e., if your „DIRECT“ referral recipient or your new partner has started staking TRILLANT, you will receive additional commissions as follows:

10% of the earnings of your „direct“ partner in **level 1**, received at the time of staking.

5% of partners' earnings in **levels 2 and 3**, received at the time of staking.

The commissions are not based on your partner's deposit but instead on your partner's weekly profits.

EXAMPLE A FOR LEVEL 1 (DIRECT PARTNERS):

A **first-line partner** has converted \$52,000 into Trillant and selected **52-week staking** (Long-term). Your partner receives a **50% return**, resulting in this example as 26,000 TRILLON for the period. The total is divided into 52-weeks, with a distribution of 500 TRILLON per week.

**Your commission percentage is
10% of 500 = 50 TRILLON per week.**

EXAMPLE B FOR LEVEL 1 (DIRECT PARTNERS):

A **first-line partner** has converted \$52,000 into Trillant and selected **26-week staking** (short-term). Your partner receives a **11% return**, resulting in this example as 5,720 TRILLON for the period. The total is divided into 26 weeks, with a distribution of 220 TRILLON per week.

**Your commission percentage is
10% of 220 = TRILLON per week.**

For levels 2 and 3 affiliates, the commission percentage is half of what you receive for a ,direct' affiliate.

The affiliate commission, which is „adjusted“ to the rate, has the following advantage:

Assuming that partners from your first three levels, repeatedly activate the Options Button as described in METHOD 2. In this case, the contract does not expire for extended periods (several years).

A partner normally only activates the options button if the price of the TRILLANT has increased in order to receive „more“ of the earning shares (profits). If he does this, then the commissions on the income from the partner recommendation also increases accordingly.

Example: The price of the TRILLANT increases from 10 cents to 12 cents, increasing by 20%. After activating the Option, your partner and you will both receive 20% more weekly profits. This increase will continue for as long as the respective contracts exist.

Question: What is the „minimum“ number of Trillants that a TTT Affiliate must have saved to be eligible for commissions?

Answer: NEW (!) concept partners only need to stake 10 Trillants in order to be eligible for commissions.

This micro-buy and sell also allows small amounts to be exchanged, sent, and saved to generate profits and commissions.

Method 4

TTT TRILLANT · TRILLON ·
3
CONCEPTS

Share Compensation on fees at the TRILLANDO marketplace

The **TRILLANDO marketplace** is an „open association“ of partners who accept the **TRILLON (stablecoin)** as a means of **payment** and direct payment for goods and services - referred to as „Acceptance Points.“

Registered and verified **Acceptance Points** charge a small, manageable fee of **3%** for their use. Appropriate discounts will be offered for larger amounts.

TTT concept partners who bring other companies to accept TRILLON as a means of payment receive a permanent share of every fee incurred by the recruited partner.

For all transactions on the TRILLANDO marketplace, a fee of 3% is paid to the company. The marketplace operator, **TRILLANDO, keeps 40%** of that as compensation for its administration and management.

60% will be distributed to the respective original referrers as follows:

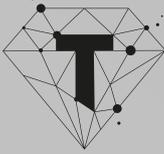

You receive 30% as the original referrer.

Your referrer receives 15% (your sponsor).

15% goes to the upline in the second level above (your sponsor's sponsor).
